### Introduction

This report holds a scenario that a consulting company needs to assist the US Congress using the Centers for Medicare & Medicaid Services database.

Main topics are discussed as follows:

- The best candidate insurance company in each state
- The dental benefit packages offered by the major insurance companies in each state
- Insurance companies are most mindful of opioid crisis and are doing their part to control it in each state

Through this report, you will get to know the best candidates for private single payer model, the coverage for dental services in different insurance companies, and the quality of care and performance of insurance companies in avoiding the addictive drugs.

## "Private Single-payer" Proposal

As the US congress is going to move to a private single payer model in few specific states, the question is which company should it corporate with. To solve this problem, we need to find out the "lion share" companies in each state, which means the company who has the largest market share. Furthermore, among each "lion share" companies, we may figure out the major players in the market as the ideal cooperators.

A parent organization may owner different marketing names. What we need to do is summarizing all enrollments of Plan C healthcare service (that's meant to filter out the contract number started with S) for different parent organizations and calculate their market share in each state. Then for each state, we can get its "lion share" company in Table 1-1.

Table 1-1 "Lion share" company by states

	State	Major Insurance Organization Name	Share
1	AR	UnitedHealthcare	0.346025
2	CO	UnitedHealthcare	0.373164
3	FL	UnitedHealthcare	0.285428
4	MA	Tufts Health Plan	0.31204
5	MT	Humana	0.639115
6	NC	UnitedHealthcare	0.467396
7	OR	UnitedHealthcare	0.227657
8	VT	UnitedHealthcare	0.793241
9	WV	Humana	0.64744

However, to avoid the fragment market disturb our result, we introduce the 0-1 Herfindahl-Hirschman Index (HHI)<sup>1</sup> variable to calculate the state's market concentration, only aiming at the states which have a single major player. Increases in the HHI generally indicates a decrease in competition and an increase of market power of few single companies, whereas decreases indicate the opposite. Then we can get the Table 1-2. An HHI above 0.3 indicates a high concentration, so we can conclude that four states that satisfy our need are VT, MT, WV and NC.

Table 1-2 HHI of healthcare insurance industry by states

Table 1 2 IIII 01 Hearthcare	modifice mustry by states	
State	ННІ	
VT	0.6556009	
MT	0.5083352	
WV	0.4747766	
NC	0.3099533	
CO	0.2622107	
AR	0.219993	
MA	0.1936516	
FL	0.1780241	
OR	0.139379	

The "lion share" companies in these four states is showed in Table 1-3. Thus, the UnitedHealthcare and Humana are candidates that the US regress should consider cooperating with when it selects its partners for a private single payer mode.

Table 1-3 Insurance company candidates for private single payer mode

	State	Major Insurance Organization Name	Share
1	VT	UnitedHealthcare	0.793241
2	WV	Humana	0.64744
3	MT	Humana	0.639115
4	NC	UnitedHealthcare	0.467396

## **Insurance Benefit Package for Dental Services**

In this section, the generosity of the insurance benefit package for dental services will be examined. We first clarify what certain kind of dental benefit offered by the plan. Not all the insurance plans offer dental care benefits. For those offering the dental care benefits, some only offer basic care and some other offer a more comprehensive plan that covers most of the dental services. Thus, we mainly analyze these two kinds of benefits to show the detailed information of insurance benefit packages for dental services in the companies of each state.

#### The condition of Preventive Dental Items

Firstly, the percentages of the enrollees enjoying the "Preventive Dental Items as a supplemental benefit under Part C" are to be calculated by states and by top-5 insurers, the formula used in this part is presented below:

$$Percentage = \frac{Total\ number\ of\ Preventive\ Dental\ Items\ for\ i\ insurers\ in\ j\ state}{Total\ number\ of\ enrollees\ for\ i\ insurers\ in\ j\ state} \times\ 100\%$$

Data processing here have some preconditions and highlights:

- WV and VT only have 4 insurers in total.
- The column used here to count "Preventive Dental Items as a supplemental benefit under Part C" is "pbp\_b16a\_bendesc\_yn".
- Lines with the same 'Contract Number' and 'Plan ID' but different "Segment ID" are only kept those with the smallest 'Segment ID' in the file "PBP Benefits 2020 dictionary.xlsx".
- Values:2 in "pbp\_b16a\_bendesc\_yn", which means no "Preventive Dental Items", are replaced by 0. The results are presented as follows:

Table 2-1 Percentage of enrollees enjoying the Preventive Dental Items

State	Major Insurance Organization Name	Preventive Dental Items Number	Enrollment	Percentage (%)

#### **Summary**

Some conclusions can be drawn from the results.

First of all, healthcare insurance market in MT shows least interest in offering preventive dental benefits and insurance market in VT shows least interest in offering comprehensive dental benefits. Moreover, Humana is usually the top comprehensive dental benefits provider among the states. As for the preventive dental benefits, apart from Humana, many other major providers, such as WellCare and MVP health care, come into being. Finally, for the WV, the Health Plan is always the top provider that not only offers the most preventive dental benefits, but also the comprehensive ones.

## Quality of care and performance of the plans

The national drug addiction crisis has aroused the awareness across the U.S., and research finds that prescription opioids play a significant role in addiction. It is really important to recognize the good insurance companies who proactively make sure their members are not on an unsafe dose of prescription opioids for a prolong period, and further reward and support them to develop a healthier and safer insurance market. To figure out these good performers, we analyze the data of using Opioids at High Dosage (UOD) from MA HEDIS Public Use Files 2018 and get the UOD rate for every contract offered by the top-10 biggest market share insurance companies in each state, showing as below.

Table 3-1 UOD rate of contract number under insurance companies by states

It should be noted that the states VT and WV only have 4 insurance companies and MT have 6 insurance companies.

We care about the UOD performance of top-10 biggest market share insurance companies in each state because these companies serve the majority of the population and will have a large great on drug addiction crisis. Thus, monitoring their performance in UOD is crucial.

To measure the UOD performance of in these companies, we calculate the weighted average of the UOD rate based on the enrollment number of the company. Especially, we get rid of the contracts with missing UOD. The ranking from the worst with the highest weighted average UOD rate to the best with the lowest weighted average UOD rate for all top-10 companies within each state is shown as below. The insurance companies with lowest UOD rates in each state are worthy to support and reward.

Table 3-2 Weight average of UOD under insurance companies by states

WV The Health Plan 0.0366077

Interestingly, we find that although many contracts of top-10 insurance companies in each state suffered from UOD risk, some of them don't have enrollment, indicating that the real negative influence can be smaller than we have expected. The relationship among contracts suffered from UOD risk but without enrollment, contracts suffered from UOD risk and with enrollment, and total contracts suffered from UOD risk is demonstrated in the below graph.

Figure 1 Relationship among contracts, UOD risk and enrollment

Furthermore, some companies of top 10 disappears when analyzing the UOD rate because they don't provide any contract with UOD risk, showing excellent performance in avoiding addictive opioids drugs. These companies should be highly praised because of their mindfulness of opioid crisis and perfect performance in controlling it. They are listed as below.

Table 3-3 Best performers in avoiding addictive opioids drugs

State	Parent_Organization
AR	Allwell
	Superior Select Health Plans
	Total Life Healthcare
CO	InnovAge Colorado PACE
	Bright Health
	Friday Health Plans of Colorado
MA	Summit ElderCare or Fallon Health
MT	Lasso Healthcare
NC	Piedmont Health SeniorCare
OR	Health Net Life Insurance Company

However, we find that the giant players, such as BlueCrossBlueShield and UnitedHealthcare, are usually the top companies with high UOD rates. These companies with large market sizes, in other words, huge influences, have not been able to ensure the enough safety usage of addictive drugs, causing significantly bad impacts on the whole healthcare insurance industry. This situation should be taken into serious consideration.

### **Conclusion**

For the best candidate insurance company in each state, we think that UnitedHealthcare and Humana can be the top choices for VT, WV, MT and NC which have highly concentrated healthcare insurance markets.

For the coverage of dental services in the insurance benefit packages, we find that market in MT shows least interest in offering preventive dental benefits and insurance market in VT shows least interest in offering comprehensive dental benefits. Moreover, Humana is usually the top comprehensive dental benefits provider among the states. As for the preventive dental benefits, apart from Humana, many other major providers, such as WellCare and MVP health care, come into being. Finally, for the WV, the Health Plan is always the top provider that not only offers the most preventive dental benefits, but also the comprehensive ones.

For the quality of care and performance of the plans, we find that although many contracts of top-10 insurance companies in each state suffered from UOD risk, some of them don't have enrollment, indicating that the real negative influence can be smaller than we have expected. Some of the top-10 insurance companies even don't offer any contracts with risk of UOD and these companies should be highly praised. Unfortunately, these companies are not the largest insurance companies in each state, instead, they are comparatively smaller than the giant ones. The giant players, such as BlueCrossBlueShield and UnitedHealthcare, are usually the top companies with high UOD rates. These companies have huge influences on the whole healthcare insurance market but did not shoulder the responsibility they should have taken to ensure the enough safety usage of addictive drugs, causing particularly bad impacts. This situation should be taken into serious consideration.
